An aerial photograph of a stunning coastal landscape. In the foreground, a massive, sheer white cliff face drops vertically into a calm, turquoise bay. The cliff's surface shows distinct horizontal geological strata. To the left of the main cliff, several smaller, rounded rock formations with similar white layers are scattered in the water. The water's color transitions from a deep blue in the distance to a lighter, milky turquoise near the shore, indicating a sandy or coral bottom. The sky above is a soft, hazy mix of pink, orange, and light blue, suggesting the time is either dawn or dusk. In the far distance, a range of low, hazy mountains stretches across the horizon. The overall mood is serene and majestic, highlighting the raw beauty of a remote coastal location.

LEAVING THINGS BETTER FOR THE NEXT GENERATIONS

We continue to work towards achieving net zero greenhouse gas emissions by 2050 for our marine operations, by investing in new technology and design, improving operational efficiency and renewable fuels. All six ships will be RINA Dolphin-certified, ensuring reduced underwater noise, which in turn contributes to the preservation of marine life. EXPLORA III, IV, V and VI will be LNG-powered, with a research project underway for EXPLORA V and EXPLORA VI to have large fuel cell capacity capable of transforming renewable LNG into hydrogen and significantly reducing emissions.

MSCFOUNDATION

Explora Journeys is dedicated to supporting environmental, humanitarian and sustainable development commitments worldwide through the MSC Foundation, a private non-profit foundation established by the Aponte family. Inspired by the MSC Group's values and motivated by a deep sense of responsibility for the planet and its resources, the foundation's mission is to utilise MSC's global reach and unique knowledge of the ocean to take immediate action that contributes to protecting and nurturing the blue planet.
